Element Name	Element Refinements	Definition	Encoding Scheme
Dublin Core			
DC.Format		The physical or digital manifestation of the resource.	
	Extent	The size or duration of the resource.	
	Medium	The material or physical carrier of the resource.	
DC.Language		The language of the intellectual content of the resource.	ISO 639-2 RFC 1766
DC.Coverage	Spatial	Spatial characteristics of the intellectual content of the resource.	edna-spatial DCMI Point ISO 3166 DCMI Box TGN
DC.Rights		Information about rights held in and over a resource.	

DC.Relation		A reference in a related resource.	URI
	Is Version Of	The described resource is a version, edition, or adaptation of the referenced resource. Changes in version imply substantive changes in content rather than differences in format.	
	Has Version	The described resource has a version, edition, or adaptation, namely, the referenced resource.	
	Is Replaced By	The described resource is supplanted, displaces, or supersedes the referenced resource.	
	Is Required By	The described resource is required by the referenced resource, either physically or logically.	
	Requires	The described resource is required by the referenced resource, either physically or logically.	
	Is Part Of	The described resource is a physical or logical part of the referenced resource.	
	Has Part	The described resource includes the referenced resource either physically or logically.	
	Is Referenced By	The described resource is referenced, cited, or otherwise pointed to by the referenced resource.	

	References	The described resource references, sites, or otherwise points to the referenced resource.	
	Is Format Of	The described resource is the same intellectual content of the referenced resource, but presented in another format.	
	Has Format	The described resource pre-existed the referenced resource, which is essentially the same	

		intellectual content presented in another format.	
DC.Contributor		An entity responsible for making contributions to the content of a resource.	
DC.Source		A reference to a resource from which the present resource is derived.	URI
